ROSY!

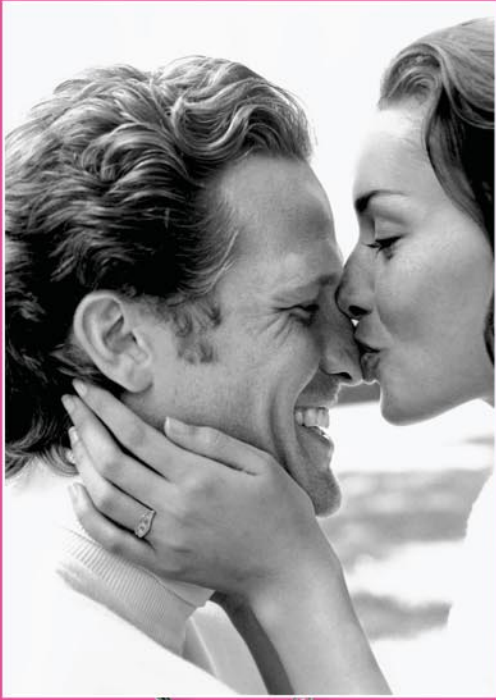

Think Pink... whether the palest of pastel or the most vibrant of fuchsia! When translated into fine jewelry, we're talking ROSE GOLD, the most feminine of all metals. Designer, *Simon G*, creates the ultimate in delicate décor for earlobe, neckline, wrist and finger.

Square Deal... fashioned in a combination of 18K rose and white gold, each design spotlights a significant center diamond of white or yellow. The contrast between delicate and dramatic is a play upon each woman's unique qualities... Hmmm!

Petal Power... how perfect for spring! *Simon G* weaves a continuous trellis of flower and foliage featuring a tiny pink diamond surrounded by white pavé diamonds and set in a combination of 18K pink and white gold.

THE PROOF IS IN THE PUDDING!

As a baker, it never really matters to me what the photo of the finished product looks like or how good the ingredients sound. What matters is the final product! Did the recipe deliver all it promised? Is the one who dines upon the delicacy licking her lips and dying for more? Does everyone else around her want what she has? My twenty plus years of experience with Keith Norris and his staff has paralleled that of successful baking...the proof IS in the pudding! Over the years, I have purchased many beautiful fine jewelry pieces from Keith, including my *Saturn* platinum engagement ring and my husband's *Tacori* platinum wedding band. I have trusted him with my tanzanite and diamond ring...the stone needed to be removed and polished!

I have traded up and traded down. Keith is always a gem when it comes to assisting me in selecting a sweet gift for one of my three daughters, or helping me with the newest trend for gifting myself.

Thanks Keith, I'll see you soon!
